

Enterprise Solutions

Mission Critical

Wireless access networks are essential for day-to-day business operations. Until now, organizations have been locked into silos of expensive and inflexible portfolios of SKUs from proprietary wireless connectivity vendors, and their expensive and inflexible contracts.

neutrino8™ solutions eliminate the tyranny of proprietary hardware vendor systems and their outrageous costs by providing enterprise-class, hardware-agnostic, wireless orchestration solutions free from vendor lock-in, while reducing OPEX by up to 90% and CAPEX up to 30x.

Much More for Less Cost

neutrino8's solutions enable secure, reliable wireless access networks, freeing resources to fund and develop other urgent enterprise priority projects. Cloud-delivered and AI-driven, neutrino8 solutions enable anytime, anywhere, real-time deep analytics, while simultaneously establishing a new, open platform that will allow you to take advantage of the latest applications and services rapidly.

Enterprise Wins with neutrino8

neutrino8 solutions provide new and unique business advantages for the enterprise including:

- Designed to continuously extract cost and operational complexity, reducing OPEX by up to 90% and CAPEX up to 30x
- AI-core, true virtualization, SDN and open systems drives lights-out, automated, hardware-agnostic, 24x7 access network orchestration
- Freedom for enterprise organizations from lock-in to expensive, burdensome, proprietary vendor systems
- Highest levels of agility and flexibility in access network deployment
- Dramatically lower total cost of ownership compared to proprietary vendor systems, delivering a materially significant faster breakeven and return on investment
