

neutrino8™'s blazePAY is a SKU-independent, cloud-based mobile payment system that enables any organization to quickly and easily create, manage and sell services from their own online marketplace.

Create and manage a flexible mobile marketplace

Guests and end users browse and order from your mobile marketplace

Key Benefits:

- Turn non-customers and browsers into customers on-the-spot
- Easy to set up and modify a portfolio of services' or products' SKUs
- Offer additional benefits to customers, visitors, tourists, subscribers, etc.
- Build strategic partnerships and enable new B2B2C revenue models
- Generate analytics of transactions and consumer analytics for managers or clients

Key Features:

- Seamless, immediate authentication and product purchase
- SKU independent
- Credit card and cash support
- Credit card payments seamlessly integrate into end-user apps — neutrino8 blazeX™ or third-party apps with SDK (no additional app required)
- Cash payments supported with an organization's pre-authorized resellers collecting the cash payment
- Full cloud integration workflow
- Data, workflow, and user capture for full audits and forensics
- Data analytics — transactions, SKUs, location sales, data, and more
- GDPR-compliant
