

blazeTEK™

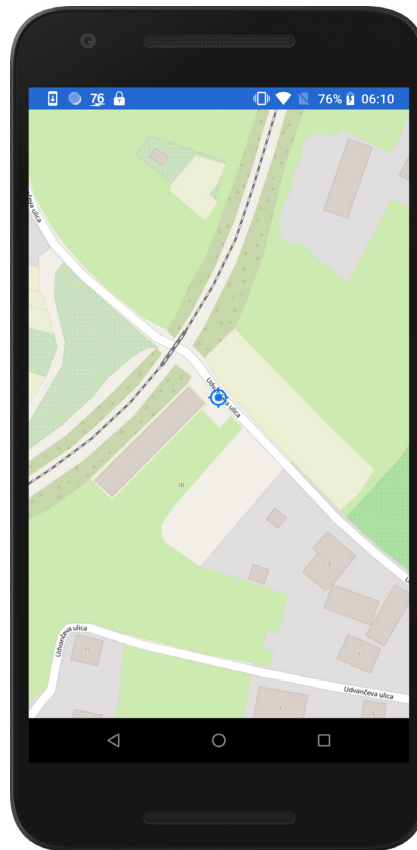

Portable Node Provisioning App
with Instant Cloud Integration

neutrino8™'s blazeTEK is a portable provisioning app designed for field technicians, network engineers, and IT managers that quickly and easily provisions new access nodes on the spot.

One-touch, instant cloud configuration

Key information auto-filled to reduce errors and boost productivity

Key Benefits:

- Quickly, easily, and dynamically provisions new nodes on the spot
- Instant integration with the cloud
- Reduces human error and complexity of setting up new remote networks
- Leverage the smartphone's features to avoid manual data-entry errors to improve productivity, save time, and avoid return visits by technicians
- Use the phone's geolocation to input node's exact location for improved network analytics — e.g. for heat maps, user journeys, coverage gaps, etc.

Key Features:

- Auto-fill key information using the phone's camera and geolocation
- Role-based user login
- GDPR-compliant
